VMJ Funky – Installation Guide

1. Unpack the full **vmj_funky_package.unzip_first.zip** package on your local PC first using WINZIP or WINRAR Archive Software.

   You should now see some directories:
   /administrator
   /components
   /modules

   The directory structure in those directories is the same as VirtueMart Component in your Joomla 1.5 site.

2. Open up an FTP Connection to your site and upload the directories to your Joomla! site.

   /components
   to
   /path-to-site-root/components/

   /administrator
   to
   /path-to-site-root/administrator/

   /modules
   to
   /path-to-site-root/modules/

   You will have to confirm overwriting some existing files in these directories.

3. Modified language file for English is available in the package. If the language of your site is other than English the please add the following language codes in your language file located at **administrator/components/com_virtuemart/languages/common**

   'PHPSHOP_VMJ_CART_PRICE' => 'Our Price',
   'PHPSHOP_VMJ_TELL_FRND' => 'Tell a Friend',
   'PHPSHOP_VMJ_REVIEW_NOT_ACTIVE' => 'Administrator has not activated Customer Review feature for this site!',
   'PHPSHOP_VMJ_NO_RELATED_PRODUCT' => 'Sorry, no related product is available for this product!',
   'PHPSHOP_VMJ_NO_RECENT_PRODUCT' => 'Sorry, you have not recently visited any other product!',

4. Now go to your **VirtueMart Configuration page**. Select the tab called '**Site**'.

5. Then select the theme as '**vmj_funky**' instead of 'default'. Click on Apply.

6. Select the Category Template as '**vmj_funky**'. Default number of products in a row should be selected as 1. Select the FLYPAGE Template as '**vmj_funky.tpl**'. Click on save.

7. Open each of your Categories. Select the Category Template as '**vmj_funky**'. Default number of products in a row should be selected as 1. Select the FLYPAGE Template as '**vmj_funky.tpl**'. Click on save. Click on save.

8. In case you find difficulties please change the permission of **vmj_funky** directory with all its files and folder to **755/777** and repeat the above process.

9. Clear Cache.
